

Hackathon Project Phases Template that ensures students can complete it efficiently while covering all six phases. The template is structured to capture essential information without being time-consuming.

Hackathon Project Phases Template

Project Title:

Smart Resume Builder

Team Name:

Dream Weavers

Team Members:

- Sri Lakshmi Sattenapalli
 - Seelamneni Teja Sai Sri
 - Shaik Afreen
 - Shaik Bushra
 - Shaik Farzana
-

Phase-1: Brainstorming & Ideation

Objective:

- Identify the problem statement.
- Define the purpose and impact of the project.

Key Points:

1. **Problem Statement:** The challenge of creating tailored resumes efficiently and effectively.
 2. **Proposed Solution:** A Smart Resume Builder using Generative AI to auto-generate professional resumes based on user input.
 3. **Target Users:** Job seekers, students, professionals, and HR recruiter.
 4. **Expected Outcome:** A user-friendly platform that generates optimized resumes with AI assistance.
-

Phase-2: Requirement Analysis

Objective:

- Define technical and functional requirements.

Key Points:

1. **Technical Requirements:**
 - Programming Language: Python (easy for beginners, extensive library support)
 - AI Model: OpenAI API (pre-trained models reduce complexity)
 - Frontend: HTML, CSS, JavaScript (basic web development stack)
 - Backend: Node.js with Express (lightweight and beginner-friendly)
 - Database: MongoDB (NoSQL, flexible schema, and easy to set up)
 2. **Functional Requirements:** Features like resume templates, AI-driven content suggestions, ATS-friendly formatting, and PDF exports.
 3. **Constraints & Challenges:** Accuracy of AI-generated content, personalization, and ensuring ATS compatibility.
-

Phase-3: Project Design

Objective:

- Create the architecture and user flow.

Key Points:

1. **System Architecture Diagram:** Backend AI model interacting with a web-based UI.
 2. **User Flow:** Step-by-step resume-building process with AI assistance
 3. **UI/UX Considerations:** Clean, easy-to-use interface with accessibility in mind
-

Phase-4: Project Planning (Agile Methodologies)

Objective:

- Break down tasks using agile methodologies.

Key Points:

1. **Sprint Planning:** Assign work tasks to team members.
 2. **Task Allocation:** Define responsibilities and distribute tasks among team members.
 - Frontend Developer: Builds the user interface and ensures responsiveness.
 - Backend Developer: Develops APIs and handles server-side logic.
 - AI Model Engineer: Integrates Generative AI for resume generation.
 - UI/UX Designer: Designs user-friendly and accessible layouts.
 - Tester & Deployment Manager: Ensures functionality, performs testing, and manages deployment.
 3. **Timelines & Milestones:** Set deadlines for core feature development and iterative improvements.
-

Phase-5: Project Development

Objective:

- Code the project and integrate components.

Key Points:

1. **Technology Stack Breakdown:** Programming languages, frameworks, APIs used.
 2. **Development Workflow:** Version control, CI/CD pipelines, testing strategies.
 3. **Challenges & Fixes:** Addressing AI accuracy, improving user experience, and handling data security.
-

Phase-6: Functional & Performance Testing

Objective:

- Ensure the project works as expected.

Key Points:

1. **Test Cases Executed:** Verify AI-generated content quality and correctness.
2. **Bug Fixes & Improvements:** Resolve usability issues and enhance AI-generated results.
3. **Performance Testing:** Optimize response times and scalability.
4. **Deployment of Application:** Hosting details for live demo and deployment.

Ensure the project works as expected.

1. **Key Points:**
 2. **Test Cases Executed:** Verify AI-generated content quality and correctness.
 3. **Bug Fixes & Improvements:** Resolve usability issues and enhance AI-generated results.
 4. **Performance Testing:** Optimize response times and scalability.
 5. **Deployment of Application:** Hosting details for live demo and deployment.
-

Final Submission

1. **Project Report Based on the templates**
 2. **Demo Video (3-5 Minutes)**
 3. **GitHub/Code Repository Link**
 4. **Presentation**
-
